LP BAGHOUSE DUST COLLECTORS

DURA-LIFE™
Twice The Life Filter Bags

DEPENDABLE, REVERSE AIR ROUND BAGHOUSE

The Donaldson® Torit® LP Baghouse dust collector provides superior bag filter cleaning performance in a reverse air design. The LP advantage is a cleaning arm with a flow-stop plate that keeps air from flowing through the bag filters before and after cleaning. Dust from cleaned bag filters cannot be re-entrained onto adjacent bags, resulting in lower pressure drop and reduced energy costs. Combine this with Dura-Life™ “Twice the Life” bag filters as standard and the LP Baghouse is better than any other reverse air collector on the market today.

THE LP FEATURES:

- Flow-stop plate cleaning arm reduces dust re-entrainment
- Award winning Dura-Life™ “Twice the Life” bag filters
- Single inlet, outlet and hopper reduces ducting and hopper outlet costs
- LP cleaning provides a constant process airflow and fewer moving parts, which reduces maintenance and disruptions to system airflow
- LP cleaning system requires no compressed air
- Optional live bottom hopper grinds dusts to prevent bridging in hopper

The LP cleaning arm features a flow-stop plate, which stops the airflow through recently cleaned bags to reduce dust re-entrainment

SUPERIOR PERFORMANCE WITH DURA-LIFE™ “TWICE THE LIFE” BAG FILTERS

iCUE™ CONNECTED FILTRATION SERVICE

Now available with the option of Donaldson’s iCue connected filtration service, an IoT enabled service designed to prompt timely maintenance, helping improve production uptime and reduce operating costs.

DURA-LIFE™ – A TECHNOLOGY BREAKTHROUGH FOR BAG USERS

STANDARD IN ALL DONALDSON TORIT LP BAGHOUSE COLLECTORS

Traditional 16 oz. (453.6 g) polyester bags are produced with a needling process that creates larger pores where dust can embed into the fabric, inhibiting cleaning and reducing bag life. Dura-Life bags are engineered with a unique hydroentanglement process that uses water to blend the fibers. This process provides a more uniform material with smaller pores, better surface loading, and better cleaning. These advantages provide twice the operating life before bags need to be replaced due to pressure drop. Longer life from Dura-Life bags lowers maintenance and operating costs and raises baghouse dust collection to a whole new level.

Dura-Life Bag-Clean Air Side
(300x)

Polyester Bag-Clean Air Side
(300x)

These photos were taken with a scanning electron microscope of bag media used in a collector that was filtering fly ash. The bags were removed after 2,700 hours of use. Air-to-media ratio was 4.5 to 1. Pressure drop was 6 in. on polyester bags and 2 in. on Dura-Life.

DURA-LIFE BAGS PROVIDE BIG BENEFITS

Dura-Life technology provides better surface loading and better pulse cleaning, resulting in:

- Two to three times longer bag life
- Energy savings due to lower pressure drop
- Reduced replacement bag costs due to fewer bag changeouts
- Reduced maintenance and operating costs due to fewer bag changeouts
- 30% fewer emissions based on EPA tests

† Based on clean filters.

* Legs included in weight.

** Dimensions should be used as general estimates. Height is based on unit with 30"(762mm) clearance under 24 FT Rotary Airlock and explosion vents. Be sure to look at dimensions after options are selected.

LP baghouse dust collectors can be equipped with bin houses to shelter 40 yard (36.6 m) dumpsters and dust from adverse weather conditions. The bin houses come with ceiling-mounted leveling screws, which evenly distribute dust throughout the entire dumpster.

PROVEN PERFORMANCE ON HUNDREDS OF APPLICATIONS

Dual 594LP12 at Door Plant
180,000+ cfm/combined (305,757+ m³/h combined)

882LP12 at Almond Plant
140,000 cfm/each (237,811 m³/h each)

THREE 684LP12 at Almond Shelling Plant
100,000 cfm/each (169,865 m³/h each)

528LP12 at Cabinet Factory
70,000 cfm (118,906 m³/h)

TWO 594LP12 at Cabinet Plant
80,000 cfm/each (135,892 m³/h each)

780LP12 at Coal Classifying Plant
75,000 cfm (127,339 m³/h)

Industry-Leading Technology

- Advanced filtration technology for optimal performance
- Reduced energy consumption and cost of ownership
- Advanced design and testing capabilities

The Most Filters and Parts

- For every brand and style of collector
- Wide range of filtration media for any application
- 90,000 filters and parts in stock and ready to ship

Unparalleled Support

- Live technical specialists
- Comprehensive pre- and post-sale support
- 40 manufacturing plants and 14 distribution centers worldwide

Significantly improve the performance of your collector with genuine Donaldson Torit replacement filters and parts

Important Notice

Many factors beyond the control of Donaldson can affect the use and performance of Donaldson products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.
